CALM THE MIND

Choose not to smell troubles when there are none
Always try to stay focused and be alert so as to deal with exigencies
Life is not complicated, only the mind makes it so
Mission carried out by a cool and steady mind will see better result

Try not to rush matters, let the things unfold by itself
Happening of events has its reason
Every day is a start of new learning

Managing the ups and downs with calmness
In one's path of learning there are many new topics for one to explore and experience
Never to give up easily but to persevere
Do not give up hope, there is a chance, there is still a hope

New environment many missions to accomplish
Extra effort to be put in to leap the taste of success
Weather all problems with a calm mind and see far
